

## 32/64 Bit Microsoft Win Pro 10 Activation License

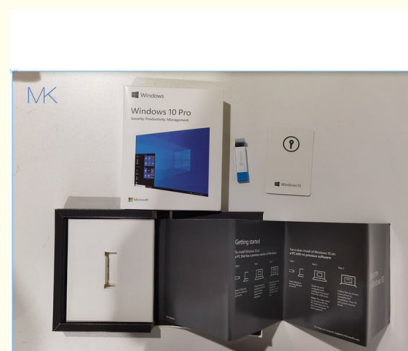

### Basic Information

- Place of Origin: USA / Customize
- Brand Name: Microsoft
- Certification: Microsoft Certified
- Model Number: Windows 10 pro retail usb
- Minimum Order Quantity: 10 pieces
- Price: Negotiable
- Packaging Details: sticker
- Delivery Time: Within 48 hours
- Payment Terms: T/T, Western Union, MoneyGram,
- Supply Ability: 10000 pieces / week

### Product Specification

- License Type: Retail
- Activation Type: Online
- Version: The Latest
- Language Option: Yes
- Version Customize: Available
- Media: Usb 3.0
- Highlight: **Microsoft Win Pro 10 Activation License ,  
64 Bit Win Pro 10 Activation License ,  
Windows 10 Pro Retail Product Key**

## Product Description

### Windows 10 Pro Retail Product Key 32/64-bit ,Win Pro 10 Activation License Online

### Windows 10 Hardware Requirements, Upgrade Path Revealed

We've seen and heard enough about Windows 10 already to know that it's going to be a rather sizable upgrade, and today, Microsoft has got down to the nitty-gritty of revealing the requisite hardware standards needed to run the forthcoming software. Below, you can find out whether your device or machine is ready to run Windows 10 when it arrives this summer, with the software giant having just outlined the minimum specs info at the WinHEC conference in Shenzhen, China. Since Windows 10 will span mobile devices as well as desktops, Microsoft has taken the opportunity at WinHEC to reveal everything there is to know about getting the software booted and updating across the board, and if you're looking to utilize Windows 10 for Phones, here's what you need to know.

The minimum amount of RAM your device will need is 512MB, which should cover most higher-end handsets and tablets released in the past couple of years. Indeed, it's the same requirement that Microsoft has in place for the current Windows Phone 8.1, meaning that if your device runs the latest (and technically, last) version of WP, you're probably good to go.

## Windows Mobile Hardware Requirements

<b>Firmware</b>
UEFI 2.3.1
Secure boot enabled
<b>Memory</b>
512MB for 32-bit
<b>Storage</b>
>= 4GB of flash
SD Card required for 4GB devices in order to support updates
<b>Graphics</b>
DirectX 9
<b>Buttons</b>
Required – Power, Volume Up/Down
Start, back, search required for phones that use WVGA display

Resolution	Memory
2560x2048 (QSGA) and higher	>= 4GB
2048 x 1152 (QWXGA) to 2560 x 1600 (WQXGA)	>= 3GB
1440 x 900 (WSXGA) to 1920 x 1200 (WUXGA)	>= 2GB
This range includes: 1920 x 1080 (FHD/1080p)	
960 x 540 (qHD) to 1366 x 768 (WXGA)	>= 1GB
This range includes: 1280 x 720 (HD/720p)	
1024 x 600 (WSVGA)	
800 x 480 (WVGA) to 854 x 480 (FWVGA)	>= 512 MB

Your phone will also need 4GB of internal memory for Windows 10 for Phones, although if your device supports microSD, you can utilize it for purpose of updates.

In terms of display size, Windows 10 for Phones will cover 3-inch displays up to 7.99 inches, and while there aren't any phablets hitting those levels on WP at the moment, it does appear that Microsoft has plans in this regard. Indeed, the fact that Windows 10 also supports QSGA, WXGA, QWXGA resolutions suggests that the Xbox maker has set its sights on larger, higher-res panels to compete with the rest of the market.

Windows 10 will be compatible with a number of mobile chips, including Qualcomm's octa-core Snapdragon 810, hexa-core Snapdragon 808, Snapdragon 615, 210 & 208. Given that the Snapdragon 208 is a 3G-only SoC, Microsoft fully intends to cater to both top-end and entry-level handsets with Windows 10 for Phones, and although Windows Phone 8.1 runs fairly smoothly even on minimal specs, supporting the likes of the Snapdragon 810 will definitely appeal to the power user market. At desktop level, users looking to install the 32-bit version of Windows 10 will require 16GB of free storage and 1GB of RAM, while the 64-bit variant will command 20GB and 2 gigs of RAM.

# Windows Desktop Minimum Hardware Requirements

Windows 7 SP1 and Windows 8.1 S14 users will be able to jump directly to Windows 10 by means of Windows Update, as will those on Windows Phone 8.1. Those running other builds, like Windows 7 RTM or Windows 8 RTM will need to upgrade by downloading an ISO image and installing manually.

## Upgrade Matrix

Initial OS	Final OS	Media (ISO)	Windows Update	
Windows 7 RTM	Windows 10	⊙	⊘	⊙ Direct upgrade path
Windows 7 SP1	Windows 10	⊙	⊙	⊘ Direct upgrade path is not supported
Windows 8	Windows 10	⊙	⊘	⊘ Not supported
Windows 8.1 RTM	Windows 10	⊙	⊘	
Windows 8.1 S14	Windows 10	⊙	⊙	
Windows RT	-	⊘	⊘	
Windows Phone 8.0	-	NA	⊘	
Windows Phone 8.1	Windows Mobile 10	NA	⊙	

### System requirements

If you want to upgrade to Windows 10 on your PC or tablet, here's what it takes.

Processor: 1 gigahertz (GHz) or faster processor or SoC  
RAM: 1 gigabyte (GB) for 32-bit or 2 GB for 64-bit  
Hard disk space: 16 GB for 32-bit OS 20 GB for 64-bit OS  
Graphics card: DirectX 9 or later with WDDM 1.0 driver  
Display: 800x600

### Windows 10 full localization languages

Arabic (Saudi Arabia), Bulgarian (Bulgaria), Chinese (Simplified, China), Chinese (Hong Kong), Chinese (Traditional, Taiwan), Croatian (Croatia), Czech (Czech Republic), Danish (Denmark), Dutch (Netherlands), English (United Kingdom), English (United States), Estonian (Estonia), Finnish (Finland), French (France), French (Canada), German (Germany), Greek (Greece), Hebrew (Israel), Hungarian (Hungary), Italian (Italy), Japanese (Japan), Korean (Korea), Latvian (Latvia), Lithuanian (Lithuania), Norwegian, Bokmål (Norway), Polish (Poland), Portuguese (Brazil), Portuguese (Portugal), Romanian (Romania), Russian (Russia), Serbian (Latin, Serbia), Slovak (Slovakia), Slovenian (Slovenia), Spanish (Spain, International Sort), Spanish (Mexico), Swedish (Sweden), Thai (Thailand), Turkish (Turkey), Ukrainian (Ukraine)

	Win 10 Home	Win 10 Pro
Create and join a domain (work network)	No	Yes
BitLocker	No	Yes
Group policy management	No	Yes
Remote Desktop	No	Yes
Hyper-V (virtualisation)	No	Yes
