Create and share professional diagrams

Supports industry standards
Visio's huge shape library supports Unified Modeling Language (UML) 2.5, Business Process Model and Notation (BPMN) 2.0, and Specification and Description Language (SDL).

Additional benefits:

Flexible editing
Change shapes in existing diagrams without losing your layout and shape connections, making it simple to adjust the look of your diagram without losing the work you've already done.

Supports multiple data sources
Visio supports Microsoft Excel workbooks, Microsoft Access databases, Microsoft SharePoint Foundation lists, Microsoft SQL Server databases, Microsoft Exchange Server directories, Azure Active Directory information, and other OLEDB or ODBC data sources.

Real-time presence indicators
See where co-authors are working in the canvas with a simple presence indicator for files saved in the cloud.

Data-driven diagramming
Automatically generate org charts from data sources like Excel, Exchange, or Azure Active Directory.

Simultaneous teamwork
See who's working on which part of the diagram, get notifications about changes, and choose when to merge those changes into the master file.

AutoCAD support
Ability to import DWG files, including enhanced file format support.

Features:

Visio Professional 2021 makes it easier than ever for individuals and teams to create and share professional, versatile diagrams that simplify complex information. Visio Professional 2021 includes updated shapes, templates, and styles; enhanced support for team collaboration, including the ability for several people to work on a single diagram at the same time; and the ability to link diagrams to data instantly. Visio Professional 2021 also helps prevent information leakage by enabling Information Rights Management.

New Azure stencils and shapes
Microsoft added many more stencils to help you create up-to-date Azure diagrams. You can use these new stencils to build Azure diagrams for network topologies, virtual machine configurations, operations, and more.

New AWS stencils and shapes
Microsoft have enabled infrastructure shapes from another major cloud provider: Amazon Web Services (AWS). You can now use stencils with the latest AWS shapes to help you create diagrams.

**Content for social distancing planning in the workplace**
Many workplaces need to be re-planned to follow the social distancing guidelines in force. This template, and the Workplace Social Distancing stencil, provide a number of shapes, fill patterns and line patterns, both scaled and unscaled, to help with this process.

Create wireframe diagrams for mobile apps
Bring ideas to life by using a Visio wireframe. A wireframe is a detailed visual model of an interface that is like a blueprint of functionality and content. These new mobile app templates are ideal for creating a low-fidelity, design sketch to present ideas, arriving at a team consensus, and forming the basis of a high-fidelity wireframe.

Visual refresh

Work with a modernized Start experience and newly refreshed tabs in the ribbon.
Experience a clean, clear style with monoline iconography that communicates action and features with simple visuals in Visio.
