# 1.8 Gigahertz Microsoft Visual Studio 2019 Professional Global Key
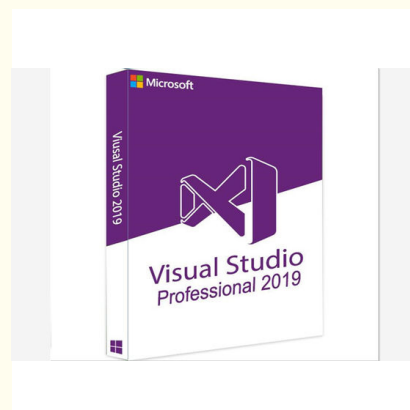

Basic Information

- Place of Origin: Ireland
- Brand Name: Microsoft
- Certification: Microsoft Certified
- Model Number: Visual Studio Professional 2019
- Minimum Order Quantity: 10pcs
- Price: Negotiable
- Packaging Details: Factory Sealed Retail box / OEM
- Delivery Time: 3-7 work days
- Payment Terms: T/T, Western Union, MoneyGram,Paypal,Skrill
- Supply Ability: 5000pcs/week

Product Specification

- Processor: 1.8 (GHz)
- Sticker Only: Support
- Email Delivery Way: Available
- RAM: 2GB RAM
- Activation Type: Online
- System Type: Windows11/10
- Warranty: Lifetime
- Hard Disk: Up To 130 GB
- Highlight: **1.8 gigahertz Microsoft Visual Studio 2019, 2GB RAM Microsoft Visual Studio 2019, Windows visual studio 2019 product key**

Product Description

1.8 gigahertz Microsoft Visual Studio 2019 Professional Global Key

With Visual Studio, Microsoft is targeting smaller teams and software developers. In addition to designing complex 64 or 32 bit applications, this integrated development environment is also intended for small, helpful tools.
This enables companies to create their own apps and programs, for example to support a cloud application or customer loyalty.
The Visual Studio, which provides efficient and stable support in program development, can also be seen in its long-term availability.
This system has been supporting software developers since 1997, and new applications and functions have been added with each variant.
Visual Studio 2019 Professional also helps developers with a variety of new programs. The developer platform is available for MacOS and Windows.
You can see below which requirements are necessary and which advantages your company gets by using the developer environment.

Microsoft Visual Studio 2019 Professional: Code development for web and app
In the current version, one of the main features is the development of Windows apps and mobile applications for Android, iOS and Windows Phone.
Windows apps are used for optimization using a touch screen and were introduced for the first time with Windows 8.

Microsoft Visual Studio 2019 Professional: Code development for web and app
In the current version, one of the main features is the development of Windows apps and mobile applications for Android, iOS and Windows Phone.
Windows apps are used for optimization using a touch screen and were introduced for the first time with Windows 8.

The following programming languages are supported by Visual Studio 2019 Professional:
C ++
Visual Basic
C # and F #
JavaScript, HTML and CSS for web development

By providing the tools for web development, you can create dynamic websites and complex web services, such as functions for connecting a home office or an online shop.
Since the high-level languages are supported, the development of games with Visual Studio is also feasible.
This system has its own code editor for each programming language, which is made available to you. The cursor-based help is just as interesting.
In the event of a misspelled or ambiguous code statement, the platform will show you this as an error. The editors provided can also be used to create programs at the same time.
If you are writing code, you will want to test it out during development. Visual Studio provides a variety of tools for debugging and errors are displayed to you immediately.
A few mistakes always creep in with larger development projects. With the code analysis, which is integrated in Visual Studio, the developer platform provides the following options.
You can use analysis tools for the management of codes in the programming languages C # and Visual Basic or you can use C and C ++ to analyze the complexity of your code and measure it.
Furthermore, with Visual Studio 2019, the creation of cloud-capable applications for Azure using a collection of tools is possible without difficulty.
All available Azure resources of the accounts used are shown to the programming team by the Cloud Explorer.

Requirements

Processor and computer	1.8 gigahertz (GHz) processor or faster
Operating system	Windows 10, Windows 8 (KB2919355 required), Windows 7, Windows Server 2012 R2 (KB2919355 required)
Memory	2GB RAM (4GB RAM recommended)
Hard disk space	depending on the features installed, up to 130 GB
Display	1024 x 768 resolution
Graphics	DirectX 9-capable graphics card
